Patent No. 6551795
Sequence 31385, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS TITLE OF INVENTION: DAGGINGNOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: NUMBER: US/09/252,991A
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT APPLICATION NUMBER: US/09/074,788
PRIOR PLILING DATE: 1999-02-18
PRIOR PLILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
SEQ ID NO 31385
LENGTH: 466

Sequence 19627, Application US/09252991A

Patent No. 6551795
GENERAL INFORMATION
TITLE NO. 6551795
GENERAL INFORMATION: RUDENCE All
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: ARRUDINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 107196.136
CURRENT APPLICATION NUMBER: US/09/252,991A
PRIOR PILING DATE: 1999-02-18
PRIOR PILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142

Patent No. 6562958
GRAREAL INFORMATION:
PAPLICANT: Gary L. Breton et al.
TITLE OF INVENTION: MUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER
TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
FILE REPERENCE: GTC99-03PA
CURRENT PILLING DATE: 1999-06-04
NUMBER OF SEQ ID NOS: 8252
SEQ ID NO 6452
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 7248, Application US/09328352

Patent No. 6562958

GENERAL INFORMATION:

APPLICANT: Gary L. Breton et al.

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER

TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS

TITLE OF INVENTION: NUMBER: US/09/328,352

CURRENT PALING DATE: 1999-06-04

CURRENT PILING DATE: 1999-06-04

SEQ ID NO 7248

LENGTH: 445

TYPE: PRI

CREANISM: Acinetobacter baumannii

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 4700, Application US/09328352

Patent No. 6562958
GENERAL INFORMATION:
APPLICANT: Gary L. Breton et al.

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER
TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
FILE REPERENCE: GTC99-03PA
CURRENT APPLICATION NUMBER: US/09/328,352
CURRENT FILING DATE: 1999-06-04
NUMBER OF SEQ ID NOS: 8252
SEQ ID NO 4700
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps 17;

; Sequence 2, Application US/09004393B
; Patent No. 6310271
; GENERAL INFORMATION:
    APPLICANT: Hanson D., Andrew
    APPLICANT: Rathinasabapathi, Bala
    APPLICANT: Burnet, Michael
    TITLE OF INVENTION: Polynucleotides Encoding Choline Monooxygenase and
    TITLE OF INVENTION: Plants Transformed Therewith
    FILE REFERENCE: UF-162
    CURRENT APPLICATION NUMBER: US/09/004,393B
    CURRENT FILING DATE: 1997-01-08
    PRIOR PALLICATION NUMBER: 60/035,147
    PRIOR FILING DATE: 1997-01-08
    SEQ ID NO 2
    LENGTHARE: A39
    MUMBER: A39

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 21, Application US/08810009

Patent No. 6711437

GENERAL INFORMATION:

APPLICANT: Briggs, Steven P.

APPLICANT: Johal, Gurmukh S.

APPLICANT: Johal, Gray, John

TITLE OF INVENTION: CELL DEATH AND DISEASE RESISTANCE IN PLANTS

NUMBER OF SEQUENCES: 65

NUMBER OF SEQUENCES: 65

CORRESPONDENCE ADDRESS:

ADDRESSER: BELL, SELTZER, PARK & GIBSON

STREET: P.O. Drawer 34009

CITY: Charlotte

STATE: No. 6211437th Carolina
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Query Match 7.2%; Score 174; DB 3; Length 35; Best Local Similarity 85.7%; Pred. Sequence 31367, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Muchanield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS TITLE OF INVENTION: ARRUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILLE REPERENCE: 107196.136
CURRENT APPLICATION NUMBER: US 60/074,788
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR APPLICATION NUMBER: US 60/094,190
PRIOR FILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
SEQ ID NO 31367
LENGTH: 463
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      17;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        137
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            299

| Patent No. 6211437 |
| GENERAL INFORMATION: |
| APPLICANT: Briggs, Steven P. |
| APPLICANT: Gray, John |
| TILLE OF INVENTION: WETHODS AND COMPOSITIONS FOR CONTROLLING |
| TITLE OF INVENTION: WETHODS AND DISEASE RESISTANCE IN PLANTS |
| CORRESPONDENCE ADDRESS: | 65 |
| CORRESPONDENCE ADDRESS: |
| ADDRESSEB: BELL, SELTZER, PARK & GIBSON |
| STATE: No. 6211437th Carolina |
| COUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compartible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/810,009
FILLING DATE: 04-MAR-1997
CLASSIFICATION: 800

Patent No. 6551795
Generate 27100, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: MUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: ARRUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: ARRUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
CURRENT APPLICATION NUMBER: US/09/252,991A
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR APPLICATION NUMBER: US 60/074,190
PRIOR PILING DATE: 1998-02-18
PRIOR PILING DATE: 1998-07-27
